MEMORANDUM FOR DISTRIBUTION

FROM: CHRISTOPHER SIMPSON, DIRECTOR
OFFICE OF MANAGEMENT ANALYSIS

SUBJECT: I-MANAGE STARS Interfaces

The Integrated Management Navigation System (I-MANAGE) Standard Accounting and Reporting System (STARS) Project Team evaluated all of the existing legacy financial system interfaces. The list of interfaces was distributed to the Financial Service Centers for those centers and the associated Satellite Offices to review and prioritize. The attached list reflects the interfaces determined to be the most critical for the implementation of STARS according to the feedback received. Other less critical interfaces will be addressed after the initial system implementation.

The list has the interfaces divided into the following four categories: 1) interfaces ready for testing, 2) interfaces to be developed, 3) interfaces to be re-evaluated, and 4) interfaces no longer required. All of the interfaces listed in categories 1 and 2 are considered critical and must be available when STARS is implemented on October 1, 2004. Interfaces listed in category 3 are currently being re-evaluated and may or may not be considered critical to the initial implementation. It is important to note that the functionality and/or data content of any of these interfaces may be altered. This will be determined through detailed analysis of these interfaces and any recommended changes will be communicated to you. Interfaces listed in category 4 are no longer required and will not be implemented with STARS.

Please review the attached list of interfaces and provide comments regarding the accuracy and completeness of the list, and your agreement or disagreement with the assigned category. Comments and/or questions should be directed to Laura Kramer, STARS Project Manager, by no later than October 31, 2003. Laura can be reached by telephone on 301-903-9932 or by email at laura.kramer@hq.doe.gov.
